

Please do not mess with my xm. I like being able to get the traffic info i need when i need it. Along with the weather info it is a real help for us truck drivers. I don't want to go back to the old ways of listening to ads for what seems to be hours just to get some traffic reports. If the broadcasters would do the same job it might be different, but we all know it won't happen. so don't mess with my xm.
